

Get the best value for your equipment and general tools.

Save time spent calling, emailing and messaging rental companies one by one. Centralize all of your quote requests and quotes received.

How it works for contractors.

1

Send quote requests to multiple rental companies in under a minute.

Create your quote request by entering your job information and selecting the **equipment or general tools** you need quotes on, for **rent or purchase**.

Once your request is created, invite the rental companies you'd like to receive quotes from and they'll be notified instantly. You can optionally select a preferred sales rep to work with from each company.

2

Receive quotes and award the request with a single click.

Review your quotes side by side in our unique pricing grid and **award the request** to the quote that best fits your needs.

Tired of follow-ups? Everyone who submitted a quote will instantly receive results and feedback.

Trusted by industry leaders.

Easy to use and adopt.

Set up takes less than a few minutes for an entire company. There is no software required and QuoteToMe works on any device. We provide onboarding docs and can do a product demo for your team, contact us to learn more.

Maintain quote data.

We act as a storage vault for all quote requests sent and quotes received, centralizing your data and your communication with rental companies.

Built for scale.

Whether you're a Sub or GC, we're built for both small and large contractors. We provide full visibility of all purchasers and their quote requests across your company.

It's free to use. Sign up today at quotetome.com
