

Massey Services 2-Day Sale Shatters Records

ORLANDO, Fla. (May. 9, 2019) — Massey Services, the nation's fifth largest pest management company and the largest privately held family-owned company in the industry, is pleased to announce another successful 2019 spring sales event. The event, in its 19th year, shattered previous records. Overall, nearly 19,000 units were sold and more than \$7.6 million in sales were generated.

The annual sales program is held in all markets where Massey Services is located – Florida, Georgia, Texas, Louisiana, Oklahoma, North Carolina and South Carolina. It provides customers the opportunity to save significant dollars off every annual service they purchase. Massey Services' Spring Sales event is specifically held in early spring, so customers can purchase services around the time of increased pest and weed activity.

"This event provides all team members the opportunity to learn more about our field operations and our customers," said Tony Massey, President of Massey Services. "We're proud of our entire team and the hard work they put into the planning and execution of this annual event."

In preparation for the event, all Massey Services' team members decorate their service centers and corporate department areas to help build excitement. The event builds comradery and team work, while also providing friendly competition between Regional Management, Service Centers and the entire corporate team.
