

NCA Training Courses

Dear Member,

RE: Training Highlights

We would like to host **Standard First Aid & CPR** and **Emergency First Aid & CPR** in the fall (if we have enough interest). Please email me if you would like to go on the mailing list: karin@niagaraconstruction.org

Reminder to **NOT** leave **Working at Heights training** to the last minute as the course dates will fill up quickly. The Ministry of Labour deadline is **October 1, 2017**. See full training dates below.

ONLINE TRAINING SESSIONS

[Construction Industry
Ethics](#)

[Applying Essential Skills in
the Classroom](#)

[Communication,
Negotiation, Conflict
Resolution](#)

Check out the twelve convenient **Management & Safety Online Courses** we offer below.

Lastly, a reminder in regards to **The Construction Industry Ethics course**, which has been designed to help you understand ethics as it relates to the construction industry.

Effective 2017, the online ethics course PLUS a full day classroom ethics course will be **mandatory** to receive **Gold Seal Certification**. Gold Seal has allocated a total of 3 credits to this course (2 for the online portion and 1 for the classroom portion). A final mark of 100% is required in order to receive a certificate of completion. Stay tuned for the in-class portion which will be scheduled in the fall - date coming soon!

Please see detailed information below and do not hesitate to contact me at the office for further assistance.

Sincerely,

Karin Sheldrick
General Manager

Working at Heights

WORKING at HEIGHTS

Ontario's Working at Heights training requirements came into force on April 1, 2015, requiring employers to ensure workers on a construction project successfully complete a working at heights training program

Construction Law

Construction Project Management

Developing Worksheets for Technical Training

First Level Supervisor Training Program

Introduction to Building Information Modeling

Introduction to Construction Estimating

Confined Spaces Safety Awareness

National Construction Safety Awareness

Pipeline Construction Safety Training (New)

approved by the Chief Prevention Officer (CPO) and delivered by a CPO-approved training provider, before the worker can work at heights.

The Ministry of Labour has now extended the April 1, 2017 deadline to October 1, 2017

Management Online Training Courses

SIGN UP FOR THE ALL NEW CONSTRUCTION INDUSTRY ETHICS COURSE!

Click on the photo below to view the demo...

Course Description

Ethical behaviour is paramount in the construction industry. By maintaining high ethical standards, and being consistent in our practices, we thrive both personally and professionally.

The Construction Industry Ethics course can help your employees navigate the ethical grey areas they face every day.

The Construction Industry Ethics course has been designed to help you understand ethics as it relates to the construction industry. The course contains interactive elements, case studies, practical examples, videos, and a course glossary.

Effective 2017, the online ethics course PLUS a full day classroom ethics course will be mandatory to receive Gold Seal Certification. Gold Seal has allocated a total of 3 credits to this course (2 for the online portion and 1 for the classroom portion). A final mark of 100% is required in order to receive a certificate of completion.

Cost: \$200.00 + HST

Applying Essential Skills in the Classroom

Course Description

This course will help instructors gain an understanding of the Essential Skills levels and how they apply to the Reading, Document Use and Numeracy skills of apprentices. Activities provide instructional ideas on how to address skills gaps and improve the ability of apprentices to succeed at technical training.

[Please click here for more detailed information.](#)

Cost: \$150.00 + HST

Communication, Negotiation, Conflict Resolution

Course Description

This course has been designed to help improve written, oral and negotiating skills within the construction industry.

[Please click here for more detailed information.](#)

Cost: \$150.00 + HST

Construction Law

Course Description

This course is designed to teach and familiarize owners, managers, supervisors and project managers with construction contracts and contract law; liabilities and responsibilities of all parties to a Contract, compiling and submitting proper extras and claims, and ways and means for leaders to avoid conflict with contracts, owners, trades, and labour.

[Please click here for more detailed information.](#)

Cost: \$150.00 + HST

Construction Project Management

Course Description

This course has been designed to help managers administer projects from start to finish.

[Please click here for more detailed information.](#)

Cost: \$150.00 + HST

Developing Worksheets for Technical Training

Course Description

This course will show instructors how to build worksheets to optimize learning opportunities for apprentices. Instructional ideas include how to use examples and answer steps to teach apprentices strategies for solving numeracy problems, and how to teach apprentices about document structure so they understand how to locate information in drawings, tables, and diagrams. Worksheets designed by instructors from various construction trades are included as examples.

Cost: \$150.00 + HST

First Level Supervisor Training Program

Course Description

Strong supervision skills are key to any construction project. This comprehensive online training program offers the critical basic skills and concepts needed to supervise a crew in the residential, institutional, commercial, industrial, and civil construction sectors. The Course uses activities, and quizzes to reinforce the learning.

[Please click here for more detailed information.](#)

Cost: \$400.00 + HST

Introduction to Building Information Modeling

Course Description

As Building Information Modeling (BIM) is adopted by more and more companies in the construction industry, its usefulness has expanded beyond the original design phase activities. This course positions BIM in the context of all phases of construction illustrating how to maximize BIM as a tool for the entire construction team. You will see how BIM fits into the construction workflow. It introduces the BIM philosophy in design, bidding, construction, commissioning, delivery, and as-built stages of construction.

[Please click here for more detailed information.](#)

Cost: \$150.00 + HST

Introduction to Construction Estimating

Course Description

To ensure project success, contractors must be able to provide accurate and professional estimates of costing and materials. This online training course will provide learners with skills and knowledge related to estimating practices, and help them understand the importance of estimates as one of the key first steps in any construction job. The lesson modules cover a wide range of topics, with interactive activities based on real-life field situations to help reinforce the lessons.

Cost: \$150.00 + HST

Safety Online Training Courses

Confined Spaces Safety Awareness

Course Description

Confined spaces can be hazardous if not approached with an understanding of how to prepare for entry, how to enter and work safely, and what to do if an incidence occurs. This course will introduce you to the types of confined spaces and the associated hazards. You will learn about the activities within a confined space, and codes of practice. Different types of hazard controls are presented including engineering, administrative, and protective equipment.

Cost: \$100.00 + HST

National Construction Safety Awareness

Course Description

Construction can be a dangerous industry to work in! You work with tools, equipment and vehicles that require special training and consideration, and you work in environments that call for tradespeople to be constantly aware of the potential hazards to your health and safety. This Construction Safety Awareness course was developed by the construction industry as a national course to give you an overview and encourage a general awareness of the health and safety issues you'll be faced with on any worksite in Canada.

[Please click here for more detailed information.](#)

Cost: \$100.00 + HST

Pipeline Construction Safety Training (New)

Course Description

This course has been designed to help the pipeline worker know how to respond to worksite health and safety issues by taking the worker through the entire pipeline construction process from beginning to end.

[Please click here for more detailed information.](#)

Cost: \$100.00 + HST
