

## Call for Interest: Construction Managers

Construction Managers who are interested in bidding on various government projects are encouraged to participate in Infrastructure Ontario's (IO) **Request for Qualifications and Standing Offer (RFQSO)** process.

The RFQSO was created as a method by which IO could solicit, evaluate and prequalify a pool of companies ("Qualified Respondents") with a demonstrated ability and capacity to design and construct using modern rapid delivery methods.

### **Construction Managers will be selected as part of a two-stage competitive and accelerated procurement process:**

1. [An RFQSO has been issued on Merx](#) to establish a list of companies with a demonstrated ability and experience in rapid delivery construction projects.
2. Companies are shortlisted and invited to enter into negotiations, which concludes with a contract being awarded to a Construction Manager.

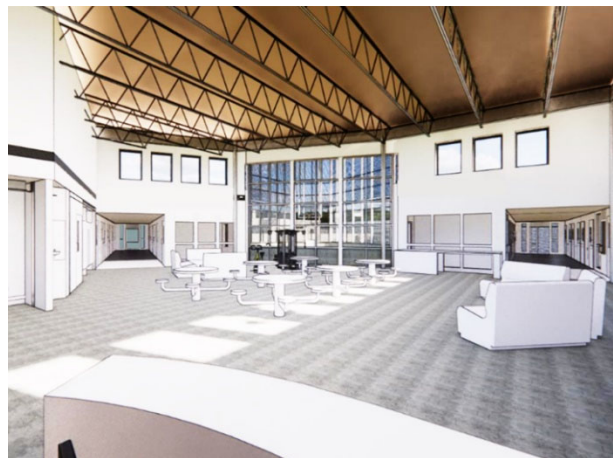

Projects are being procured by IO on behalf of various Provincial Ministries, using an accelerated build model. IO has used the RFQSO model for its accelerated rapid builds program for projects in the Long-Term Care and Correctional sectors.
