

Faster Takeoff, More Accurate Estimates

Improve your bid-to-hit ratio fast, by quickly performing quantity takeoffs, estimates, and professional proposals

More Accurate Estimates

Gain peace of mind going into projects by eliminating manual, error-prone calculations and spreadsheets.

All in One Workflow

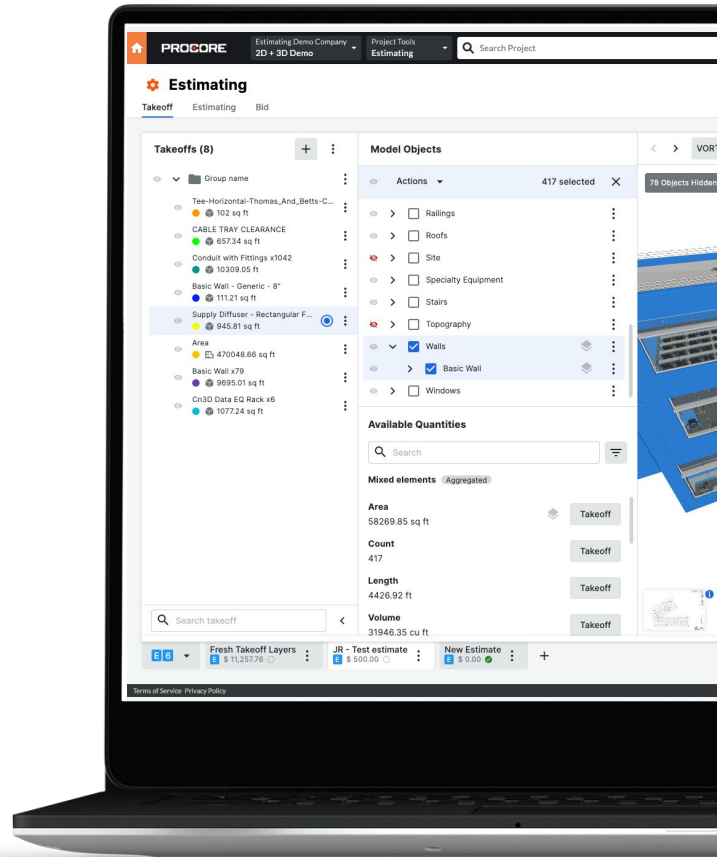

Extract quantities directly from drawings and data rich BIM models, access embedded cost catalogs, and create estimates and easily create a budget from one solution.

Win More Work

Quickly build accurate construction cost estimates and win more projects in less time. Choose from a variety of takeoffs including 3D Takeoff, Automated Area Takeoff, linear takeoffs, and more.

Handoff Projects Faster

Seamlessly transition from estimating to course of construction without having to switch between multiple apps.

"I think being able to takeoff from the 3D model is awesome...Certainly you are going to make us more accurate. We are not going to miss things with the model as you can visually see what objects you have layout for and what objects you haven't. That's awesome."
