# Phase 1 Refresh & Enhancements

# Phase 1 Refresh & Enhancements

## Increased Comparison Features

Compass users will now be able to Compare their selected business to the following comparisons:

- Schedule Type
- Industry Sector
- Overall Business Activity
- Business (Name, Size, and Activity)

## Graph Order

The Injury Rate Graph on the Injury Statistics Page will now be presented at the top

## Increase Download Features

Compass users will now be able to download all graphs/images in PDF format

## Registration Graph Claims Display

The *Injury Claims by Registration Year* graph will now reflect only allowed claims (both lost time and no lost time) by injury year

## Compass Data as of March 2018

Previously, Compass displayed year-over-year data as of March of the following year (ie. data in 2012 was as of March, 2013). With the new refresh, Compass will now display all year over year data as of March 2018 to reflect most current.

## Increased Search Results Features

Compass users will now be able to View 25, 50, and 100 business' at a time, while navigating through search results instead of 10 at a time. Users will also be able to download search results of business names/addresses into a CSV or Excel file.

## New Injury Characteristics

A new injury characteristic has been introduced; the leading occupation with the highest number of lost time injuries.

# Phase 2/3 Next Steps

# Next Steps...

Phase 1 Annual Data Refresh, inclusive of the previous enhancements will go live end of **July**... keep an eye out!

Phase 2/3 Requirements on going, design and build of Phase 2/3 Prototype planned for 2018.

Compass team will reach out to stakeholders for feedback on look and feel, design, and functionality late summer/early fall. Stay tuned we want your input!

Overall launch of Compass Phase 2/3 tool planned for 2019.
