Maestro Technologies Inc. | 1625 Boul. Lionel-Boulet, Suite #300, Varennes, QC J3X 1P7
1 888 833-7777 mrennie@maestro.ca www.maestro.ca

Company History:	Founded in 1989, Maestro Technologies is a leading developer of construction management software solutions for the construction industry – and only the construction industry.
Management:	Pat Delgesso, V.P., Sales and Marketing Michael Rennie, Director, Canadian Sales
Principal Fields of Activity:	Our portfolio of software solutions was designed from day one to address the dynamic, project-driven environment of the construction industry. From submitting initial bids, to tracking change order details, determining percentage of completion, and managing payroll – the Maestro solution tracks all aspects of your projects from planning to closing using a single user interface.
Services Provided:	Our dedicated team of knowledgeable and experienced professionals thrive on helping our customers. Services include installation, configuration, training and customer support.
Typical Projects:	Maestro Technologies' Construction Management Software helps over 500 customers across Canada better manage their projects and finances.
