

# FREE Topcon Slit Lamp BREATH SHIELD

In response to **COVID-19**,  
Topcon Healthcare is providing  
**FREE** Breath Shields for its  
Slit Lamp customers.

As the COVID-19 pandemic continues to escalate across the globe, Topcon Healthcare, the market leader in slit lamps for the eye care community, has announced a series of initiatives and programs designed to support its customers during this time of unprecedented challenges.

**Topcon Healthcare is now offering a FREE BREATH SHIELD\* for Topcon slit lamp customers.**

As healthcare providers, eye doctors are required to be in close contact with patients while performing an exam and are, therefore, unable to maintain the CDC recommended distance of 2 meters. In order to combat this and help to prevent the transmission of respiratory illnesses including COVID-19, Topcon is now offering all of its slit lamp customers a free breath shield that fits onto their instrument and provides a first line of defense for both healthcare providers and patients.

**Visit [bit.ly/topconshield](https://bit.ly/topconshield) to request your breath shield**

Topcon Breath Shields are designed to reduce exposure to airborne contaminants but they are not proven to prevent the 2019 novel coronavirus (COVID-19) or other infectious diseases. Please refer to the CDC's website for specific guidance on how to protect yourself and others from spread of disease. <https://www.cdc.gov/coronavirus/2019-ncov/index.html>

\*Existing customers are allowed one breath shield per device, upon authentication, and while supplies last. This offer only extends to certain models of Topcon slit lamps.

NOTE: Please note that the value of any items provided by Topcon hereunder may be reported to the Centers for Medicare & Medicaid Services (CMS) in accordance with the Physician Payments Sunshine Act and any applicable state regulation. For further information, please visit CMS's website at <https://www.cms.gov/openpayments/>.
