

Agenda:

Presentation 1 - Sewer Cross Bores

A utility cross bore can occur when an underground utility unintentionally intersects with another existing utility. This scenario can carry potential risk to workers who may inadvertently disturb the crossed lines during sewer cleaning. Learn more about how to avoid potential risks, identify the location of cross bores and excavate safely with Joe Johnson Equipment.

Presentation 2 - ORCGA Update

The ORCGA will soon launch its Excavator Training Program across Ontario. Hear more about this exciting, new initiative.

Throughout 2020, the ORCGA has been focused on developing solutions to the Late Utility Locate situation in Ontario. Find out what the latest developments are.

Presentation 3 - Ontario One Call

Ontario One Call's experts will present the annual end of year report, detailing what this year looked like from Ontario One Call's perspective as well as what steps have been taken to alleviate late locates in the province in 2020 and into 2021.
