

Keynote Speaker - Cliff Meidl: The Fire Within

While working on a construction site, Cliff jackhammered into three buried power lines and received a massive electrical shock, sending approximately 30,000 volts of electricity through his body.

The darkest moment of Cliff's life led directly to the remarkable achievement of becoming an Olympic athlete and becoming a beacon of hope and inspiration for himself and others.

Once Cliff found the fire within that propelled him forward towards success, there was no stopping him!
