

FREE WEBINAR

February 3 | 1:00 – 2:30 PM EST

ASPHALT PAVEMENT RESILIENCE

PART
2

PAVEMENT RESILIENCE IN PRACTICE

KEY TAKEAWAYS

- 1 Identify the factors that led to successful natural disaster responses for roadway infrastructure in different communities and environmental conditions.
- 2 Understand the unexpected challenges and obstacles that should be considered beforehand to enable the production and placement of asphalt pavement following a natural disaster.
- 3 Learn how the availability of different equipment and material technologies can make pavements more adaptable and help a community respond to natural disasters and changing environmental conditions.
