

Huntsman Building Solutions Announces Partnership with No-Burn, Incorporated

Leading Spray Foam Manufacturer to Make Select No-Burn

Intumescent Coatings Available to Contractor Customers for Purchase

The Woodlands, TX (September 9, 2021) – [Huntsman Building Solutions](#), a global leader in high performance, sustainable building envelope solutions, today announced a partnership with [No-Burn, Incorporated](#), the proven and trusted fire protective coatings company. The partnership enables Huntsman Building Solutions to provide a selection of No-Burn's intumescent coatings for purchase by contractor customers throughout the United States. The coatings, No-Burn Plus XD and No-Burn Plus ThB, are both ideal for use with spray polyurethane foam insulation and, effective immediately, are available for sale through Huntsman Building Solutions.

"As a recognized category leader in fire protection, No-Burn, Incorporated and its intumescent coatings both complement and are ideally paired with Huntsman Building Solutions' robust line of spray foam insulation solutions," says Doug Brady, vice president of global innovation and product management. "Now our valued contractors will have easy access to No-Burn's highly effective fire protective coating solutions."

No-Burn Plus XD is an intumescent coating used as a component in an alternative ignition barrier assembly. The fire protective coating is specifically designed for use with spray polyurethane foam insulation, protecting spray foam insulation in attics and crawl spaces. When exposed to heat and flame, No-Burn Plus XD expands, creating a char-barrier that protects treated substrates from fire. The coating is ideal for use with both open cell and closed cell spray foam insulation and is available in Gray.

No-Burn Plus ThB is a spray on thermal barrier and fire-resistant coating. The coating is ideal for application in interior and exterior assemblies, as well as conditioned or unconditioned spaces, and is designed specifically for use where spray foam insulation is installed. Used as a component in an alternative thermal barrier, an alternative ignition barrier, and/or an exterior fire rated wall assembly, No-Burn Plus ThB passively protects the spray foam in the event of a fire by delaying the rise in temperature, which in turn delays or prevents the spray foam from igniting. The coating is ideal for use with both open cell and closed cell spray foam insulation and is available in White and Gray with the field option to tint to Charcoal.

"Huntsman Building Solutions is a global leader in spray polyurethane foam and is therefore a natural partner for No-Burn, Incorporated" says Bill Kish, president and CEO of No-Burn,

Incorporated. “The companies’ products are ideally suited to work in concert, providing high performance insulation alongside key, code-compliant fire protection in a variety of built environments, whether residential, commercial or specialty.”

For additional information and to purchase No-Burn Plus XD and No-Burn Plus ThB, contact David Cuddihee at dcuddihee@huntsmanbuilds.com and (214) 938-9912. About Huntsman Building Solutions:

The Huntsman Building Solutions business is a global leader in high-performance, sustainable building envelope solutions. Its systems and solutions are widely utilized to optimize commercial and residential structures worldwide in both new construction and retrofit applications. Formed in 2020 with the acquisition of Icynene-Lapolla and its combination with Demilec, the Huntsman Building Solutions business capitalizes on legacy industry technologies, environmental stewardship and the power of the Huntsman brand.

About Huntsman:

Huntsman Corporation is a publicly traded global manufacturer and marketer of differentiated and specialty chemicals with 2020 revenues of approximately \$6 billion. Our chemical products number in the thousands and are sold worldwide to manufacturers serving a broad and diverse range of consumer and industrial end markets. We operate more than 70 manufacturing, R&D and operations facilities in approximately 30 countries and employ approximately 9,000 associates within our four distinct business divisions. For more information about Huntsman, please visit the company's website at www.huntsman.com.

About No-Burn, Incorporated:

No-Burn, Incorporated is a specialty chemicals manufacturer and marketer based in the USA, known for our intumescent and fire retardant coatings, saving more than structures – they save lives. For nearly 30 years, growing from a family-owned and operated, regional manufacturer to an internationally recognized, trusted leader in passive fire protective coatings, we deliver high-performing, code-compliant fire protection in fire-resistant, fire-resistance rated and flame spread or interior finish uses. For more information about No-Burn, Incorporated, please visit the company's website at www.noburn.com.
