

CONCRETE PUBLICATIONS

A. SURFACE PREPARATION AND COATING APPLICATION OF CONCRETE (PB-COM01)

The complete collection of SSPC surface preparation specifications and standards for concrete.

This compilation provides the latest information relating to the best practices for surface preparation and coating application on concrete surfaces. The compilation provides the latest industry standards including the newly updated SP-13/NACE No.6 Surface preparation of Concrete standard and many more. Additional to the industry standards, the compilation includes JPCL articles and technical proceedings from SSPC conferences all directly relating to surface preparation and coating application on concrete surfaces. This is a must have for any individual wishing to enhance their knowledge of preparing and protecting concrete.

Check sspc.org for prices and more information

B. FUNDAMENTALS OF CLEANING AND COATING CONCRETE (PB-00110)

Presents a thorough examination of concrete's physical and chemical properties; procedures for mixing, placement, consolidation, finishing, and curing; and the causes and prevention of concrete deterioration. Contains detailed information on surface cleaning, repair, and preparation; the selection, application, and performance capabilities of protective coating and lining systems; inspection; failure analysis; and much more. Additional features include a glossary of terms, a detailed reference bibliography; and other resource materials. Also available on CD-ROM with additional material.

C. CONCRETE COATING ASSESSMENT GUIDE (PB-00111)

Organized according to the steps typically followed in concrete coating condition assessment and containing a special section of color illustrations to support identification of various concrete conditions that may be encountered in the field. This guide includes a comprehensive glossary that defines key terms used in condition assessment and an appendix of removable sample forms that can be used to supplement those examples given in the text.

D. CONCRETE COATING TEXTURE STANDARD (PB-01901)

SSPC's new Concrete Coating Texture Standard establishes a classification system for textures of finish coats of applied concrete flooring systems. This standard is used in conjunction with a set of tactile comparators, that establish a standard terminology that can be used by owners, specifiers, and concrete flooring installers to describe various coating surface textures.

SSPC CONCRETE STANDARDS

SSPC offers a variety of standards in the concrete coating industry. SSPC strives to create standards that are as unique as the surface they describe. Such standards include:

-  SSPC-Guide 20, Guide for Applying Thick Film Coatings and Surfacing Over Concrete Floors
-  SSPC-TR 5/ICRI Technical Guideline 03741/NACE 02203, Design, Installation, and Maintenance of Protective Polymer Flooring Systems for Concrete
-  SSPC-SP 13/NACE No. 6, Surface Preparation of Concrete

and more at sspc.org. Check back for updates to current standards and look out for new ones coming soon.
