LITHIUM-ION

Response Awareness

WITH
LEAD INSTRUCTOR
CHRIS PFAFF

This course will introduce responders to the hazards **presented by Lithium-Ion** batteries. We will present a short history on the problem, why these fires are so difficult to put out and provide tools on how to effectively and safely respond to emergencies involving Lithium-Ion batteries.

TOPICS INCLUDE:

- ✓ Battery types, platforms and uses, and light chemistry discussion
- ✓ Fire code limitations
- ✓ Respond options and too
- ✓ Disposal consideration
- ✓ Fire investigation considerations
